HPD OIL AIR SEPERATOR/CATCH CAN

- The HPD oil air separator has been designed to remove oil mist from the rocker cover and going into the intake of the turbo. This oil can build up in the intercooler and piping causing inefficiency and eventually destroying silicone hoses. It also eliminates build-up of carbon from EGR and oil forming a black paste which clogs inlet manifolds and inlet ports. The HPD oil air separator has some unique features here are some of them.
- Internal stainless mesh filters that can be removed for cleaning.
- Dip stick to check oil level.
- Stainless steel mounting bracket and 4 bolts with 5 positions available.
- Simply unscrew base to empty oil.
- Variety of hose sizes available 10, 12,16,19,25.
- 360° swivel top inlet/outlet with #8 O-ring port thread allows hose to rotate to any position
- Side inlet/outlet with #8 O-ring port thread
- Vehicle specific kits including hoses clamps and mounting brackets.
